

What is different about the EcoProven Sanitizing Solution?

What EcoProven is

- A proprietary non-toxic virucide formula
- EFFECTIVE against SARS-CoV-2 virus - which causes Covid-19 disease
- Biodegradable, Alkaline solution (before and after dilution)
- Ingredients are nature sourced & sustainable
- Solution is activated by water – keeps working while moisture is present
- Environmentally friendly - safe for people, pets, plants and pets
- EPA certified safe for water, marine life and wildlife

What EcoProven does

- Solution is effectiveness based on colloidal chemistry
- Electrically charged nano-particles break down oils and grease
- Attacks fatty lipid membrane of the SARS-CoV-2 virus
- Emulsifies oils, grease so they can be easily rinsed away
- Biostatic – removes food source for bacteria - will slowly die

- Neutralizes mold & mold spores
- Leaves residual micro-coating – prevents mold from returning
- Attacks sulfur-based compounds – the source of many odors
- Mixes well with other ingredients

What EcoProven won't do

- pollute water – EPA tested & certified (fish safe)
- expose people, pets, environment to harsh chemicals
- leave chemical fumes / odour
- leave a residue or streaks
- harm carpets, fabrics, rubber, plastics and gaskets
- burn (non-flammable)
- harm painted or powder coated surfaces

rated “most efficient cleaner” in US Navy tests

What's NOT in EcoProven

- petroleum based chemicals
- phosphates, nitrates, silicates, enzymes, sulfonates, ammonia or bleach
- soaps
- fragrances
- coloring
- corrosives
- grit or abrasives
