

A safe, effective and convenient countermeasure against COVID -19

EcoProven Anti-Viral Nasal Spray is a safe, effective and convenient preventative measure against SARS-CoV-2 virus - that causes COVID -19. The EcoProven technology turns nature's most common solvent (water) into a powerful virucide. The formula is a proprietary blend of plant-based and all natural ingredients (ionic and anionic compounds) that laboratory testing has confirmed is effective at penetrating the fatty lipid structure that surrounds and protects the SARS-CoV-2 virus.

EcoProven helps prevent initial infection of the SARS-Cov-2 virus in the mouth and upper respiratory tract. As a nasal spray application, EcoProven covers the inside of the nasal passages and down to the throat. The solution acts quickly to neutralize the SARS-Cov-2 virus that may have been breathed in through the nose before it can embed itself and/or migrate deeper into the lungs.

EcoProven Anti-Viral Nasal Spray is also helpful in mitigating early stage infections and reducing symptoms. For individuals who have tested positive, the product has demonstrated an ability to interrupt the on-set of COVID -19 symptoms. In addition, the product has also shown that it can stall the progression of the illness with people that are already presenting early symptoms.

The potent biological effect of EcoProven stays active for hours - sustained by the presence of moisture (water) in the upper respiratory tract. In this way, EcoProven as a nasal spray is a very effective defence against COVID-19 and helps reduce the potential spread of the virus to others.

Physical Properties

Physical State:	Liquid at 70 F	pH:	10.4 NEAT (in concentrate)
Color:	Clear	Foaming:	Extremely low foaming
Odor:	Odorless	Viscosity:	@20c > 225 - 375 (290 avg) cps
Taste:	Tasteless	Pounds per gallon:	8.52
Flashpoint:	None at 212 F	Specific Gravity:	1.029
Freezing Point:	32 F	Effective Period:	As long as water is present

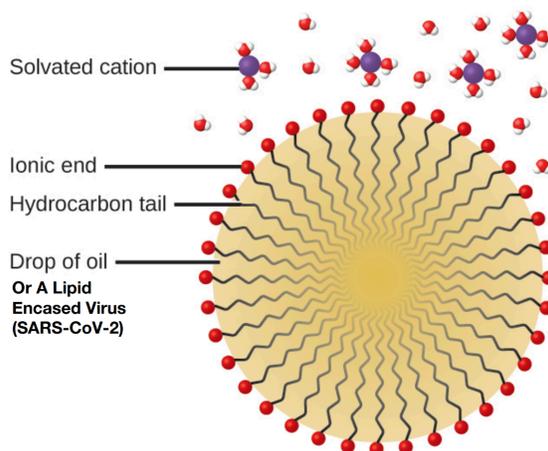

EPA Company ID#: **97213**

EPA Facility ID #: **2935261**

How EcoProven Works

EcoProven's technology combines with water to become a hyperactive colloidal water solution. This solution contains countless microscopic ionic particles which discharge electrical charges in all directions. The virus bodies are "caught in the crossfire" of these ionic charges and the protective outer lipid membrane of the virus is shredded. Any viruses that are in contact with EcoProven's powerful colloidal action are destroyed.

Once this outer protective layer is destroyed, the inner RNA is exposed and the combination of the colloidal action and antimicrobial surfactants quickly destroys the virus RNA core as well.

Testing & Certifications

- Water Sense Certified
- Green Guard Certified
- CSA Sustainability Certified
- Approved & Used by United States Navy
- Approved & Used by United States Postal Service
- Approved by United States Department of Agriculture

Protect from temperatures below 32 F and above 90 F
No special handling / storage procedures are needed
