

APPLICATION NOTES

EcoProven Anti-Viral Mouth Wash / Spray

How EcoProven Anti-Viral Mouthwash / Mouth Spray Works

EcoProven's technology combines with moisture in the upper respiratory tract to become a hyperactive colloidal water solution. This colloidal solution creates an anti-viral barrier that coats the cells lining the mouth and upper respiratory tract. This solution contains countless microscopic ionic particles which discharge electrical (ionic) charges in all directions. The virus body is "caught in a crossfire" of these ionic charges. This "crossfire" shreds the protective outer lipid membrane of the virus. Any virus that is in contact with EcoProven's powerful colloidal action is destroyed.

Once this outer protective layer is destroyed, the inner RNA is exposed and the combination of the colloidal action and antimicrobial surfactants quickly destroys the virus's RNA core.

How EcoProven Anti-Viral Mouthwash Helps Individuals that are Actively Ill with COVID-19

For individuals that are actively presenting COVID-19 symptoms, EcoProven Anti-Viral Mouthwash **helps** reduce the severity and duration of those symptoms by reducing the viral load in the mouth and upper respiratory tract. The mouth and upper respiratory tract is considered to be the primary entry point into the human body by the SARS-CoV-2 virus which will then imbed itself into the cell walls and cause active COVID-19 infection. The total surface area of the upper respiratory tract represents a major percentage of the COVID-19 "internal infection area". By reducing (or eliminating) the viral load in this area, it allows the body's natural immune system to focus its concentration and response on the remaining areas of active infection.

Recommended Dosage Amounts/Volumes

To use EcoProven Anti-Viral Mouthwash as a preventative measure, sip or spray 2 to 3 millilitres of mouthwash into mouth and gently swish for at least 30 seconds. Ensure that all areas of mouth and upper throat have been thoroughly rinsed. Spit out excess liquid when finished.

For individuals that are COVID-19 positive or actively displaying symptoms, sip or spray 3 to 5 millilitres of EcoProven Anti-Viral Mouthwash into mouth and gently swish in the mouth for 1 minute to thoroughly wet all surfaces in the mouth and upper throat area. Spit out excess liquid when finished.

EPA Company ID#: **97213** EPA Facility ID #: **2935261** FDA Product #: **pending**

How & When to Use

Asymptomatic (COVID-19 Negative) Individuals - To be used as a Preventative Measure. Recommended dosage is 2-3 millilitres 1-3 times a day as needed depending upon possible virus exposure.

Asymptomatic (COVID-19 Positive) Individuals - To be used to mitigate the onset and progression of COVID-19 disease symptoms. Recommended dosage is 5 millilitres 3 times a day for 2 weeks beginning immediately after COVID-19 positive diagnosis. Thereafter, use 2-3 millilitres 1-3 times a day as needed depending upon possible virus exposure.

Symptomatic (COVID-19 Positive) Individuals Actively Sick - To be used to reduce the duration and severity of the COVID-19 disease symptoms. Recommended dosage is 5 millilitres 3-4 a day for 2 weeks. Thereafter, use 2-3 millilitres 1-3 times a day as needed depending upon possible virus exposure.

Symptomatic (COVID-19 Positive) Individuals in Respiratory Distress
To be used to reduce the duration and severity of the COVID-19 disease symptoms. Recommended dosage is 5 millilitres 3-4 a day for 2 weeks. Thereafter, use 2-3 millilitres 1-3 times a day as needed depending upon possible virus exposure.

1/2 (.5) fluid ounce = 15 milliliters
1 fluid ounce = 30 milliliters

Recommendations & Precautions

- Always maintain proper hydration when sick.
- Drink water when using this product.
- Not for consumption. Do not drink. Spit out extra fluid when finished "swishing".
- For maximum benefit, do not eat or drink for 15 minutes after application. It is recommended that you eat and drink prior to application, if practical.
- To date, there have not been any hypersensitivity or allergic reactions reported.
- However, if hypersensitivity or allergic reactions do occur, discontinue use immediately. If reaction is severe, contact a medical professional.
- Keep out of the reach of children. Supervise use by children 3-6 years old.
- For longest life, store between 0 - 30 C (32 - 100 F). Avoid temperatures over 40 C (104 F).
- Freezing will not damage. Efficacy will be maintained. Simply thaw and use.
